

## 21-1000: BENCH-TOP SHAKER

Reciprocating shaking and mixing with bench-top convenience is now available. Glas-Col's Bench-Top Shaker is an adaptable, user-friendly shaker that is capable of many hours of continuous shaking and mixing. This shaker:

- Features a variable-speed motor that provides gentle, low-speed shaking to vigorous, high-speed shaking.
- Requires no load balancing.
- Features a built-in shaking head with easy-to-adjust knobs for quick loading.
- Will accept a variety of glassware holders for mixing and shaking.
- May be placed inside a fume hood for added safety.

Features a strong, heavy-duty construction that permits maximum loads of up to 20 pounds.

### Specifications

Motor Speed: Adjustable to 125 rpm maximum.  
 Load Weight Capacity: Up to 20 lbs. (9.1 kg).  
 Electrical: 6-ft, 3-wire grounded cord.

Electrical Rating: 50/60 Hz, 120V & 240V.  
 Size: 13"w x 10"d x 11-3/4"h.  
 Weight: 48 lbs. (21.8 kg).  
 Finish: Foxtip gray and charcoal.

Catalog Number	Description	Input Voltage	RPM
099A S60012	Shaker base	120V	2-125
099A S60024	Shaker base	240V	2-125

## 21-1120: SEPARATORY FUNNEL HOLDER

(up to 500 ml)

The funnel holder will accommodate up to three funnels at once, depending on size, and can hold funnels as large as 500 ml. You can mount one or two of these holders on the shaker base.

Just load the funnels with the stopcock down, adjust to the desired shaking position, and turn on the shaker. The funnel is secured by an easily adjusted yoke, and the stopper is held in place by a built-in elastic band.

If you're mixing materials that create pressure while being shaken, the pressure can be relieved automatically with the Snorkel Stopper, which is substituted for the regular stopper, and is held in place with the elastic band. It automatically relieves pressure over one pound (psi).

Catalog Number	Description
099A FR435SS	One, two, or three 60-250 ml funnels
099A FR600SS	Two 125-500 ml funnels
